WHY THE CHANGE?

California Advancing and Innovating Medi-Cal (CalAIM) is a multi-year state-wide initiative to improve the quality of life and health outcomes of our population by implementing broad delivery system, program, and payment reform across the Medi-Cal program.

The Behavioral Health components of CalAIM are designed to support whole-person, integrated care. It aims to consolidate specialty mental health services and substance use prevention and treatment services into a single county-based behavioral health program. As such, a centralized place to call will make it easier for the community to seek services.
