Important Confidentiality and Use of Information

Your answers help us determine what supports a family needs and how quickly we can connect them to shelter and services.

Our focus is to help families stay safe and get stabilized. Homelessness itself is not a reason for child welfare involvement. Information is shared only when required by law to protect someone's safety (for example, mandated reporting applies when a child is in immediate danger).

Support Oriented and Non-Punitive Use Statement

Identifying challenges related to homelessness, parenting stress, school attendance, supervision, or system involvement will not be held against the family.

These questions are asked to help determine needs, reduce instability, and connect families to appropriate supports, not to assign blame or determine parental fitness.
