Definitions

**5150 Diversion:** The initial 5150 call did not result in a 5150 application being completed.

**5150 with Hospitalization:** Client was hospitalized either day of or day after 5150 application was completed.

**Arrived on Scene:** Call that was not canceled and CCIT arrived after dispatch.

**Average Length of Stay (Days):** Average number of days clients were hospitalized for inpatient treatment that began on the day of or day after CCIT enrollment. This measure is reported for all CCIT enrollments and for CCIT enrollments that had a 5150 application completed.

**Calls For Service:** Calls for service refer to both mental health, and non-mental health calls that were dispatched to CCIT.

**Canceled Call:** Call CCIT did not respond to due to being canceled before arrival.

**Care Court Referral:** Client has been referred to Care Court by CCIT clinician.

**Calls That Led to a 5150 Assessment:** Original call dispatched to CCIT included report of individual with harm to self, harm to others or grave disability.

**Disposition of Enrollment:** Refers to the disposition of the client after engagement by CCIT.

**Diversion Rate (5150):** The number of clients diverted from a 5150 application divided by the total number of 5150 calls during the reporting period.

**Diversion Rate (emergency room):** The number of CCIT enrollments diverted from the emergency room divided by
