

QI Outcome Study Report: *Template*

Submitted By:

Date of Plan:

Date Reviewed:

Facility/Unit:

An **Outcome Study** is the **results of the medical care provided** to patients (i.e. number of patients with normal HbA1c results, number of patients with BP >140/90, number of patients that get re-admitted for same dx within 30 days, number of patients on multiple medications)

I. State the Problem or Indicator you want to study

Describe the problem or issue to be studied.

II. Methods used to assess current problem or issue

Describe how you discovered the current problem or indicator used to assess how the site is performing currently.

III. Results of Assessment

Describe the results of the above outlined study. These are the results of the assessments of how things are currently working, **prior to implementing an intervention or improvement plan**. Attach CQI audit tool, time study, or log review results to the end of this report.

IV. Plan

Discuss the needed steps to effect the desired change. Attach your 5 WHYs analysis, and Corrective action plan to the end of this report.

V. Goal

Describe the desired changes, using the SMART goal format. Discuss the needed steps to effect the desired change. Attach a copy of your **Corrective action plan**.

VI. Follow-up Activities

Describe follow-up activities that were performed. Attach documentation of education completed, new forms implemented, list of new process steps, and re-audit tools to the end of this report.

VII. Results

Describe results of follow-up activities, and how the results related to the goal. Please include any future plans for study, if appropriate. Attach final CQI re-audit tools, final updated time study results or log review used to the end of this report.
