Public Health  
Departmental Administration**County of Sacramento****Recruitment: Epidemiologist****Salary range: \$97,092.00 - \$117,992.88 annually**

Sacramento County Public Health is now recruiting an Epidemiologist to support communicable disease surveillance and investigation, including HIV and other sexually transmitted diseases, vector-borne disease, zoonotic disease, and priority antimicrobial resistant organisms. The position may also be cross trained in other areas (e.g., foodborne/waterborne illness, vaccine-preventable disease, TB, disaster epidemiology, vital statistics, maternal/ child health) depending on operational needs.

This is a full-time permanent position with full benefits and a six-month probationary period.

**Ideal candidate will:**

- Have expertise in quantitative data cleaning and analysis using statistical software programs, preferably SAS;
- Be familiar with database management, disease surveillance and disease reporting systems, such as the California Reportable Disease Information Exchange (CalREDIE) or other similar platforms;
- Possess effective data visualization skills (Excel, PowerBI);
- Have experience using geographic information systems (GIS);
- Be familiar with syndromic surveillance, such as BioSense platform;
- Have proficiency in applying steps of an outbreak investigation;
- Have experience designing, collecting and analyzing survey data in platforms such as Qualtrics;
- Possess understanding of SEMS/NIMS and ICS principles; and
- Possess knowledge of public health essential services.

Additional position information can be found on the [Sacramento County Jobs website](#).

**Application cut-off dates: 10/4/2024, 10/25/2024 (final)**
