EMS Medical Director

Signature on File

EMS Administrator

Purpose:

- A. To utilize Basic Life Support Ambulances within the 911 system for low acuity calls identified through the Emergency Medical Dispatch (EMD) process.

Authority:

- A. California Health and Safety Code, Division 2.5, Section 1797.200

Policy:

- A. All ambulance responses will be determined using the Medical Priority Dispatch System (MPDS) protocols and respond based on the level and mode of response approved by the Sacramento County Emergency Medical Services Agency (SCEMSA) Medical Director.

Procedure:

- A. A SCEMSA-authorized Medical Services Dispatch Center shall ensure that each request for ambulance service is managed in a manner consistent with established Agency policies, procedures, and the Medical Priority Dispatch System (MPDS) protocols.
- B. A Basic Life Support Ambulance will be dispatched for service requests meeting the dispatch criteria using the MPDS.
- C. Emergency Medical Technicians shall use the SCEMSA-approved policies, procedures, and protocols within their Scope of Practice to assess and treat patients when dispatched to a request for service. This shall

include, but not be limited to, documentation standards (electronic patient care report; ePCR) and Receiving Facility Radio Reports.

- D. If the patient assessment conducted by the Emergency Medical Technicians (Basic Life Support Ambulance) reveals a potentially unstable patient, the crew shall rendezvous with a paramedic resource (ALS Ambulance/ ALS Fire/Supervisor/QRV). If the time to rendezvous with a paramedic resource is greater than the estimated transport time to the closest receiving hospital, then the BLS crew shall transport to the closest receiving hospital. Transport mode, i.e., Code 2/3, is at the discretion of the transporting crew.

- E. If the patient refuses transport after the assessment is completed and/or any treatment provided, "Against Medical Advice" paperwork and process must be completed. Complete the process as outlined in SCEMSA policy 2101.18.
- F. All transports involving Basic Life Support Ambulance in the 911 system must be reviewed through the Quality Improvement Process at the ambulance provider level. Any case that needs further attention and review shall be forwarded to the Quality Improvement Coordinator at SCEMSA.
- G. The Emergency Medical Technician shall contact their immediate supervisor for any circumstances that may not be covered in this policy while responding to a request for service, on scene of a request for service, and/or transporting to the receiving hospital.
